baumatic-waste-disposers](http://www.baumatic.co.nz/baumatic-waste-disposers)

Waste disposers are the ultimate kitchen convenience. Mounted discreetly under the sink, a waste disposer will effortlessly grind down and dispose of most food waste. The resulting tiny particles are automatically flushed away down the kitchen drain, where they can eventually be recycled via wastewater.

Food waste accounts for around 20% of all household rubbish. Using a waste disposer will keep your bins cleaner and less smelly, your kitchen fresher and more hygienic – and reduce the volume that ends up in landfill sites.

WASTE DISPOSERS

GAWD12

1/2hp Waste Disposer

Stainless steel impellers
1/2 hp motor
Double hollow structure
Overload protection
Air switch included
Can be connected to a dishwasher
Noise level 30 dB
Stainless steel grinding system

Air switch

GAWD34

3/4hp Waste Disposer

Stainless steel impellers
3/4 hp motor
Double hollow structure
Overload protection
Air switch included
Can be connected to a dishwasher
Noise level 20 dB
Stainless steel grinding system

Air switch
